Dear Dental Colleagues,

We live in exciting times! This will be the fifth year of my tenure as the director of the Continuing Education Department at the IU School of Dentistry. This past year was busy as we finally moved into our new offices. Come visit us at 1050 Wishard Blvd. on the second floor. We will hold many of our smaller classes and seminars in our training room here at the new facility. Otherwise look for us to hold our other classes at the IU School of Dentistry, the Campus Center, or other off-campus venues as they are announced.

As part of our Emphasis Series this year we are pleased to announce an entire curriculum associated with Implants! As many of you may already know, the school has recruited two new faculty members, Dr. Dean Morton, our Prosthodontics chair, and Dr. Waldemar Polido, our Oral Surgery Pre-Doctoral Program director. They have collaborated to create three exciting courses relative to implants. These courses are being held in conjunction with our new Center for Implant, Aesthetic and Innovative Dentistry facility located on the fourth floor of the dental school. Please refer to page 10 in the catalog, as well as our web page at http://ce.dentistry.iu.edu for additional information.

We begin the pages of our catalog with the backbone of our practices – the allied health auxiliaries. We have again put together an exciting Dental Hygiene Series. Each of the three programs of the series are filled with information that is important, relevant and timely. In addition to the series, we will also offer our traditional Expanded Functions for Dental Assisting, Coronal Polishing and Fluoride Application for Dental Assisting, Radiology Certification Training for Dental Assisting and Local Anesthesia for Dental Hygiene. We encourage dental practice staff to attend any and/or all of our courses because the additional knowledge will empower them to assist with the best treatment for your patients.

The Faculty Focus Series continues to grow in attendance, and we are especially proud of the accomplishments, research and interests of our faculty members. Every month a different dental school department will present an informative lecture in a format that fits your schedule. Consider signing up for the entire series and attend the required Ethics and Jurisprudence course for free. In addition, if your entire office needs to be certified in CPR, please contact us so we can design a program to fit your schedule if one of our programs is not convenient. For further information visit our website at http://ce.dentistry.iu.edu, e-mail us at dsce@iupui.edu or call toll free at 888-373-4873.

We are approaching 25 years that we have partnered with the Indiana Dental Association to bring you the IUSD-IDA Academy of Continuing Education. This year we continue that tradition with both spring and fall course offerings that will complement your abilities and enhance your knowledge base. Our collaborative efforts to bring continuing education opportunities to IU School of Dentistry do not end there. Look for the Burstone Symposium, held every other year in conjunction with the Department of Orthodontics and Oral Facial Genetics, the MK Hine/Laskin Lecture Series each spring with the Indiana Section of the American College of Dentists, the Mini Pediatric Residency with the American Academy of Pediatric Dentistry for its review course in the fall, and the John F. Johnston Refresher course coming up next summer. If your group would like to collaborate on a continuing education project, please feel free to contact me personally.

In bridging all of our communication styles we are publishing this catalog as well as posting it on the IU School of Dentistry Continuing Education website at http://ce.dentistry.iu.edu. Please refer to this website for future updates as we continue to work to bring you the best continuing education programs. We need to hear from you with regard to content and production. Please feel free to contact the CE Office at dsce@iupui.edu, toll free at 888-373-4873, or contact me personally at hweingar@iu.edu, 317-278-9055. I look forward to working together to make our programs meaningful and interesting.

See you in class!
Harvey Weingarten DDS
Director of Continuing Education Program
Assistant Clinical Professor, Comprehensive Care Clinics
Indiana University School of Dentistry
1050 Wishard Blvd, Suite 2012
Indianapolis, IN 46202
(317) 278-9000 CE Office
(317) 278-9055 Private Office
(317) 278-9003 Fax
Dear Colleagues:

Like our profession, the Indiana University School of Dentistry is transforming. In less than a year, our students and faculty will be practicing in the new James J. Fritts, DDS Clinical Care Center, a 45,000-square-foot clinic with 125 state-of-the-art operatories in a modern, glass and steel, light-filled building. It will be a magnificent 21st century complement to the historical limestone façade that flanks this modern clinical center.

We are also transforming our curriculum to be current with digital technology, which is where our students live. We cannot teach 1980s dentistry in a 21st century world. And each year, almost 200 transformed students walk across the stage to collect their hard-earned diplomas. They go from wide-eyed first-year students to oral health care practitioners, ready to serve their communities.

Although we may be seasoned providers, we too must continuously transform and evolve. Advances in research, technology and information challenge us constantly to learn new ways to improve patient care.

IUSD’s Continuing Education Department has produced a stellar collection of courses this year so that our alumni and the Indiana dental community may keep learning and growing as professionals. The wide array of offerings – both in person and online – will take you to the forefront of technological and scientific advances to provide the most current, evidence-based diagnostic, preventive and treatment options to your patients.

Whatever your practice goals are, continuing education at IUSD can play an important role in your professional and personal success. We are transforming dental education, one lifelong student at time.

I look forward to transforming alongside you.

Warm regards,

John N. Williams, DMD, MBA
Dean
Indiana University School of Dentistry

Please refer to the website for the latest information on course offerings:

http://ce.dentistry.iu.edu
We are committed to bringing you the latest ideas and concepts to energize you and your practice. The IUSD Hygiene Series is one of our longest ongoing CE programs.

Part I will be at the Renaissance Indianapolis North in Carmel, IN - 11925 North Meridian Street, Carmel, IN, 46032, 314-816-0777

We will be returning to The Willows on Westfield, 6729 Westfield Blvd. Indianapolis, IN 46220, (317) 251-2628 for Part II and III.

Visit their website at: http://www.willowsonwestfield.com/

Don’t forget! License renewal is due on March 1, 2018. New rules include 19 hours of CEUs since March 2, 2016, 10 hours of which must be completed ON SITE, as opposed to online. You must also complete two hours of ethics and jurisprudence, which are included in Part II of our series. Hygienists must also complete a CPR course -- only two hours can be counted toward your CE requirement.

This year’s programs are offered on an individual basis for $170 per day, per hygienist. Special savings: if enrollment is received before September 20, 2017, the cost for the series will be $340 for the first hygienist and $310 for each additional hygienist from the same office.

If you are registering more than one person from the same office, you will need to register each person individually and check the box for the additional participant discount. The office name must be listed on all registrations if registering more than one person.

Refund Policy:
For series: No refunds will be issued for the series after September 1, 2017. There will be no refunds for any missed sessions. For individual programs: No refunds will be issued less than two weeks prior to each course.

There is a $30 cancellation fee for the series and $20 for each individual course for any refunds issued. There will be no transfer of enrollment to other programs or to other individuals.

In dentistry, we recognize an unhealthy mouth can indicate an unhealthy body, but we are unsure of next step initiatives to get our patients onto the road to good health. During the morning session, Dr. Knowles will review the clinical oral manifestations of stress, disease, and behavior types and will review current studies associating the oral and systemic connections.

In the afternoon session, Dr. Knowles will take a deep look into interpersonal communication and will use her background in communication and small business to help you see patient care through a different lens. Patients want a communicator and someone who cares. This course examines what it takes to fulfill exceedingly high patient expectations in our over-stimulated world.

Learning Objectives:
• Learn how to collaborate with professionals to address comprehensive patient needs through the Five Friends Approach.
• Learn and evaluate your communication style.
• Learn how to decipher what a patient wants so you can give them the show they anticipate.
• Learn how to use the A.W.E. technique to improve communication with each other and with patients.

About the Speaker:
Lisa Knowles, DDS, owns a private practice in Michigan and is an adjunct professor at the University of Michigan School of Dentistry. She is a Board of Trustees member for the Michigan Dental Association and is the editor for the Central District Dental Society. Dr. Knowles is a visionary thinker and an energy analyzer who looks at the whole picture as well as the whole patient. She speaks and writes broadly about dentistry and works to help others understand the oral and systemic connections between dentistry and medicine.

Update on Oral Cancer and Its Common Imitators AND To Refer or Not to Refer.....That is the Question!

PRESENTED BY DR. PAUL EDWARDS and DR. HARVEY WEINGARTEN
Friday, February 9, 2018
8:30 a.m. - 2:30 p.m. 5 CEUs

We begin this course with a review of the different clinical presentations of oral cancer, placing an emphasis on early recognition. More common conditions that may look similar to early oral squamous cell carcinoma, such as traumatic ulcers, lichen planus, idiopathic leukoplakia, candidiasis and vesiculobullous conditions, will also be reviewed. Clinical features that can be used to differentiate between these conditions will be stressed.

The afternoon session will satisfy your CE requirements for Ethics, Indiana Law and Jurisprudence. Come and join in the discussion as to why we refer or why we don’t refer. After reviewing the Principles of Ethics and the Hierarchy of Treatment, we will consider the ethics as well as the practical issues of referral. You might be surprised as to the basis of why we refer. In addition, we will talk about the changes in the Indiana law satisfying the requirement for Indiana State Licensing.

About the Speaker:
Paul Edwards, DDS, MSc, is professor in the Department of Oral Pathology, Medicine and Radiology at IU School of Dentistry. Dr. Edwards received his MSc in Biochemistry and DDS from the University of Toronto and his specialty in Oral and Maxillofacial Pathology from Long Island Jewish Medical Center in New York. He is a Diplomate of the American Board of Oral and Maxillofacial Pathology.

Harvey Weingarten, DDS, received his DDS degree from the IU School of Dentistry. Dr. Weingarten has been in private practice in South Bend, Indiana, for 37 years. Dr. Weingarten is associate clinical professor with IU School of Dentistry and director of Continuing Education. He currently serves as a NERB/CDCA examiner in the capacity of vice-chairman.

Pharmacology: What’s New and What to Review

PRESENTED BY DR. ANN ESHENaur SPOLARIch
Friday, April 6, 2018
8:30 a.m. - 2:30 p.m. 5 CEUs

Treating medicated patients and administering, dispensing and applying medications are critical components of a dental hygiene practice. The purpose of this course is to discuss how to safely treat medicated patients throughout the dental hygiene process of care. An update about hot topics in pharmacology will be provided, including antibiotics, anesthetics and chemotherapeutic agents. Strategies to reduce risks and improve medication safety in your practice will be discussed.

Learning Objectives:
• Discuss the benefits of drug information systems that should be used to obtain information regarding drug indications, contraindications and adverse events.
• Discuss simple strategies to reduce risks associated with medication use in the dental office.
• Discuss the relationship of antibiotic stewardship, the use of antibiotic premedication for patients receiving dental hygiene care.
• Discuss considerations for use of topical and local anesthetic agents.
• Review common misconceptions about the safety of chemotherapeutic agents used to reduce plaque and gingivitis.

About the Speaker:
Ann Eshenaur Spolarich, PhD, is an internationally recognized author and speaker on pharmacology and the care of medically complex patients, presented more than 900 lectures and has more than 100 professional publications. She is professor, course director of Clinical Medicine and Pharmacology, and director of Research at the Arizona School of Dentistry and Oral Health, where she also teaches part-time in the Special Care Clinic, as well as associate director of the National Center for Dental Hygiene Research & Practice.

Location:
Willows on Westfield
6729 Westfield Blvd.
Indianapolis, IN 46220
(317) 251-2628

(Case Sensitive)
This course will provide the required didactic and laboratory training for certification under the rules established by the Indiana State Board of Dentistry. By taking this intensive and comprehensive program, participants will learn how to safely and properly administer local anesthesia to their patients. Upon completion, participants will be eligible to take the CDCA (formerly the NERB) Local Anesthesia Exam and apply for the required Indiana Local Anesthesia Permit.

You will learn:

**Supraperiosteal/Maxillary Infiltrations**
- PSA
- MSA
- ASA

**Nerve Blocks**
- Greater palatine/nasopalatine
- IAN
- Long buccal
- Gow-Gates

This course includes case-based review of medical emergency management and troubleshooting.

This program is designed for licensed dental hygienists who want to receive certification in the administration of block and local infiltration anesthesia. You must be a currently licensed dental hygienist practicing in Indiana to take this course, as well as current in BLS for the Healthcare Provider.

Once registered, you will receive instructions on how to set up online access to the course podcasts. Participants are encouraged to take notes of any questions/issues to discuss during the first day of on-site class. You will also need to purchase the course textbook – Handbook of Local Anesthesia by Dr. Stanley Malamed. You must review the text and access all podcasts and pass the review quizzes prior to attending the first session on October 14. This date will be followed by two lab/clinic sessions on October 21 & October 28, 2017.

Participants will act as live patients for practice and competency checks. Each participant is required to sign a release in order to participate. Attendance is required at all sessions. **Failure to appear to any of the sessions will result in automatic failure.**

If you have questions with regard to the course, please contact the IUSD CE office for assistance or additional information at 888-373-4873 or dsce@iupui.edu.

**Faculty**

**Kyle Kramer, DDS, MS** is a clinical assistant professor and board certified dentist anesthesiologist within the Department of Oral and Maxillofacial Surgery and Hospital Dentistry at the IU School of Dentistry. After receiving a DDS degree from IUSD in 2006, Dr. Kramer pursued additional postdoctoral training, which culminated at The Ohio State University where he completed a residency in dental anesthesia as well as received his master’s degree.

**Continuing Education Credits**

Participants who complete this program will earn 16 hours of CE credit for the podcasts and lecture, and 32 hours of CE credit for the lab and clinic sessions. IUSD is an ADA CERP Recognized Provider.

**Tuition**

$1100. Tuition includes clinic/lab supplies, continental breakfast and lunch. Each participant must purchase the Handbook of Local Anesthesia by Dr. Stanley Malamed. No refunds will be issued once you have logged into Canvas or within three weeks of the first lab session. A $50 cancellation fee will be applied to all refunds.

**Location**

Saturday laboratory sessions will be held at the IU School of Dentistry, 1121 W. Michigan Street, Indianapolis, IN 46202.

**To Register**

Participants must register online at: http://go.iu.edu/1AuT (Case Sensitive)
Faculty Focus Series

Once again each department at the IU School of Dentistry has created engaging half-day programs for your professional enrichment. Individual lectures are $79 each with the exception of the Ethics and Jurisprudence lectures, which are $50 each. Register for the entire series of lectures for $399 and save more than $150! Plus, your $50 tuition for the Ethics and Jurisprudence course will be waived.

Faculty Focus courses will be held on Fridays at the IUPUI campus from 8:30-11:30 am. You will receive 3 CEUs for each course in the series, 2 CEUs for Ethics and Jurisprudence. Indiana University is an ADA CERP Recognized Provider. For detailed information on these lectures, their locations and our cancellation policy, please visit our website at http://ce.dentistry.iu.edu

IUSD faculty, staff and students, go to: http://go.iu.edu/1GFW (Case sensitive: number “1” followed by capital GFW)

SEPTEMBER 22, 2017 - PERIODONTICS & ALLIED DENTAL
Managing Medical Emergencies in Clinical Practice, presented by Justin Villenueva, DDS, Periodontic resident
The Role of the Allied Dental Professional in Emergency Patient Management, presented by Lisa Maxwell, LDH, MSM, clinical assistant professor and director of Dental Hygiene and Michelle Priest, EFDA, CDA, BS, clinical director of Dental Assisting, Department of Periodontics and Allied Dental Programs
Management of Acute Periodontal Conditions in Clinical Practice, presented by Daniel Shin, DDS, MSD, clinical assistant professor and director of Pre-Doctoral Periodontics, Department of Periodontics and Allied Dental Programs
Management of Bleeding Emergencies in Clinical Practice, presented by Yusuke Hamada, DDS, MSD, clinical assistant professor, Department of Periodontics and Allied Dental Programs

OCTOBER 27, 2017 - CARIOLOGY, OPERATIVE DENTISTRY AND DENTAL PUBLIC HEALTH
Oral Biofilm Formation Processes and its Effects on the Use of Antibiotics in Dentistry, presented by Simone Duarte, DDS, MS, PhD, associate professor, Department of Cariology, Operative Dentistry and Dental Public Health

NOVEMBER 2, 2017 OR FEBRUARY 15, 2018 - ETHICS AND JURISPRUDENCE
To Refer or Not to Refer, That is the Question, and An Update on Indiana Dental Law, presented by Harvey Weingarten, DDS, clinical assistant professor and director of Continuing Dental Education

NOVEMBER 3, 2017 - ORTHODONTICS
Music, Breathing and Occlusion and How Wide is Too Wide? presented by Katherine Kula, MS, DMD, MS, chair, Department of Orthodontics & Oral Facial Genetics

DECEMBER 8, 2017 - BIOMEDICAL AND APPLIED SCIENCES
Translating Biomedical Knowledge into Diabetic Patient Management, presented by L. Jack Windsor, PhD, professor, Department of Biomedical and Applied Sciences, adjunct associate professor of Anatomy and Cell Biology; Director, Tobacco Cessation & Biobehavioral Group Assistant Professor, Department of Biomedical and Applied Sciences, Division of Dental Biomaterials; Bruce D. Gitter, PhD, clinical professor of Pharmacology, Department of Biomedical and Applied Sciences; and Laura Romito, DDS, MS, MBA, associate professor, Department of Biomedical and Applied Sciences

JANUARY 19, 2018 - ORAL PATHOLOGY, MEDICINE AND RADIOLOGY
Update on the Recognition and Management of Chronic Ulcerative Oral Lesions: Lichen Planus, Pemphigoid and Pemphigus, presented by Paul C. Edwards, MSc, DDS, professor, Department of Oral Pathology, Medicine and Radiology
Recent Advances in Oral Health and Systemic Disease: Connection Between Periodontitis, Salivary Diagnostics and Rheumatoid Arthritis / Alzheimer’s Disease, presented by Mythily Srinivasan, BDS, MDS, PhD, associate professor, Department of Oral Pathology, Medicine and Radiology
How to Identify and Manage the Dry Mouth Patient, presented by Susan Zunt, DDS, MS, chair, Oral Pathology, Medicine and Radiology

FEBRUARY 23, 2018 - PEDIATRIC DENTISTRY
Update on Management of Trauma to the Teeth and Supporting Tissues in the Pediatric and Adolescent Patient, presented by James Jones, DMD, MSD, EdD, PhD, chair, Department of Pediatric Dentistry
Update of Pharmacology in the Pediatric Patient, presented by Juan F. Yepes, DDS, MD, MPH, MS, DrPH, associate professor, Department of Pediatric Dentistry

MAY 11, 2018 - ENDODONTICS
Diagnosis and Management of Cracked Teeth, presented by Josef Bringas DMD, DDS, MS, associate professor, Department of Endodontics Local Anesthesia for the Restorative Dentist, presented by Kenneth Spolnik DDS, MSD, chairman, Graduate Program Director and professor, Department of Endodontics
Radiology Certification Training for Dental Assistants

This course is divided into three separate components, a didactic component that is completed online, a laboratory component that is completed at the IU School of Dentistry and a clinical component that is completed in your office under the supervision of a licensed Indiana state dentist. You must satisfactorily complete each component before moving on to the next.

Note: If you have begun a program in the past and have applied for a provisional student permit, please contact the Indiana State Board of Dentistry to make sure there will be no problem with this course. You are limited to one provisional permit.

Prerequisites:
Participants must have one (1) year of dental assisting experience within the last five years and have the opportunity to fulfill the clinical component in order to enroll in this program.

Faculty:
Heather Taylor, LDH, BS, MPH is visiting clinical assistant professor in the Department of Cariology, Operative, and Community Dentistry at the IU School of Dentistry.

Tuition:
$579. Enrollment in this program will cover all didactic and laboratory fees. It will be the responsibility of each participant to fulfill the required clinical component and to take and pass the DANB Radiology Health and Safety Exam. In case of questions, contact the CE office at dsce@iupui.edu or call 317-278-9000.

Dates:
Lab sessions will be scheduled throughout the year. Next lab sessions are November 11, 2017

Location for Laboratory Component:
IU School of Dentistry
1121 West Michigan Street
Indianapolis, IN 46202

To Register:
http://go.iu.edu/1AG5 (Case Sensitive: number “1”, capital AG, number “5”)

For information on the Indiana State Department of Health Medical Radiology Services, please visit http://www.in.gov/isdh/23279.htm.

For additional information on these courses for the Dental Auxiliaries please visit our website at: http://ce.dentistry.iu.edu.
Expanded Functions for Dental Assistants
Available each fall and winter

Students will receive training in terminology, anatomy, rubber dam technique, resin and amalgam restorative techniques for Class I, II, III, IV and V restorations, as well as the necessary matrix technique for each restoration.

Requirements:
Currently employed and possess one of the following qualifications: Certified Dental Assistant degree, dental assistant with at least two years hands-on dental assisting experience within the last five years. Registrants must also be currently employed.

This program meets a total of six sessions. The first session is a Friday evening followed by an all-day Saturday. Remaining dates are Saturdays and will be held at the IU School of Dentistry, 1121 West Michigan Street, Indianapolis, 46202 in laboratory room S315. Attendance is mandatory at all sessions. Spring dates will be posted to our website at http://ce.dentistry.iu.edu

Fall Tuition: $1,350
Spring Tuition: $1,499

To Register: http://go.iu.edu/1AG7 (case sensitive: number “1”, capital AG, number “7”)

Coronal Polishing and Fluoride Application for Dental Assistants
Available year-round

The Indiana State Board of Dentistry allows both coronal tooth polishing and fluoride application as a permitted function of a trained and certified dental assistant. These board-approved courses provide the didactic and laboratory training required for certification.

Requirements:
Graduate of a Commission on Dental Accreditation of the American Dental Association approved program or a practicing dental assistant for a minimum of one year in the last five years.

Once registered, participants will receive instructions that will allow them access to Indiana University’s Canvas system. All didactic instruction for both courses will be completed online. All lecture material will be available online 24 hours a day. Upon completion of the didactic assignments and passing all of the online quizzes, participants will enroll in one of the available Saturday laboratory and clinic sessions.

Laboratory sessions are two hours for each course on the same day. Once the didactic and laboratory requirements are fulfilled, each participant must demonstrate clinical competency on a minimum of five (5) patients under the supervision of a licensed Indiana state dentist.

Tuition: $495 for each course, $850 for both Coronal Polishing and Fluoride Application
To Register: http://go.iu.edu/1AuU (case sensitive: Number “1”, capital A, small u, Capital U)

http://ce.dentistry.iu.edu
Coming later this year to IU School of Dentistry is the new Center for Implant, Aesthetic and Innovative Dentistry (CIAID), a comprehensive, interdisciplinary clinic for patients with advanced implant and aesthetic needs, providing interdisciplinary, high-tech care in one setting. CIAID will be housed within the remodeled fourth floor clinic and is expected to open in the Fall of 2017.

“The Center for Implant, Aesthetic and Innovative Dentistry is a state-of-the-art clinical and didactic facility,” said Dean John Williams. “The center brings together a team of oral health leaders from the fields of prosthodontics, periodontics, oral and maxillofacial surgery, general dentistry and research, and will be supported by the latest advanced technology.”

Dr. Dean Morton, CIAID Director, said the center will streamline education and patient management within the pre-doctoral comprehensive care and graduate specialty programs.

“We are focused on improving the breadth and quality of care for our traditional patient pool,” said Dr. Morton, who also chairs the IU School of Dentistry’s Prosthodontics Department. “Expanding our ability to provide students and their patients with contemporary implant and aesthetic treatment options, while utilizing the most modern equipment, will position our programs now and well into the future.”

Pre-doctoral and post-doctoral dental students will be the primary care providers within the center. Specialists across disciplines will mentor students in a productive and interactive teaching environment, Dr. Morton said. He added that this vertical, interdisciplinary model, pioneered in medicine, is a care delivery system in which the complete spectrum of treatment is provided in one setting.

In addition to contemporary, integrated care and teaching, the center faculty will conduct research and provide continuing education training for dentists. Look for information on our website at http://ce.dentistry.iu.edu

Dr. Morton’s IU School of Dentistry colleagues will serve as CIAID co-directors, including, pictured from left: Dr. Waldemar Daut Polido, Oral and Maxillofacial Surgery; Dr. Kamalphob Phasuk, Prosthodontics; Dr. Dean Morton, Prosthodontics; Dr. Michele Kirkup, Comprehensive Care and Innovation; and Dr. Yusuke Hamada, Periodontics.

Refer to the website for dates and additional CE course information: http://ce.dentistry.iu.edu
EMERGENCY MANAGEMENT

Lecture and Hands-On Simulation Training Course

Presented by Kyle Kramer, DDS, MS
March 23, 2018
8:00 AM - 5:00 PM
12 CEUs

This all day seminar on medical emergencies will provide the dentist with the didactic foundations in assessing and managing the common medical emergencies as well as the unique hands-on opportunity to work in a small group in a simulated environment using a high fidelity human simulator. This program was developed to provide a few core presentations after which the participants will be divided into two groups with each group being provided several simulated experiences. This high fidelity simulator provides a “real life” emergency without practicing on a patient. The participant will become immersed in the events as the simulator can mimic a “real” patient in various ways such as: breathing, wheezing, developing upper airway edema, having a palpable pulse, and opening and closing its eyes. As the participants manage each situation, observers will provide debriefings and feedback after which the participants will be provided the opportunity to repeat the scenario management. The participant will also be exposed to different emergency instrumentation and the ability to have a hands-on experience.

At the end of the course, the participant will:
1. have an understanding of what emergency equipment and instrumentation is necessary for a dental office
2. have an increased familiarity with how to use various emergency equipment and instrumentation for medical emergency management in the dental office
3. have an understanding of how to assess and manage the common emergencies that can happen in the dental office

Faculty
Kyle Kramer, DDS, MS is a Clinical Assistant Professor and board certified dentist anesthesiologist within the Department of Oral Surgery and Hospital Dentistry at the IU School of Dentistry. After receiving a DDS degree from IUSD in 2006, Dr. Kramer pursued additional postdoctoral training, which culminated at The Ohio State University where he completed a residency in dental anesthesiology and also received his master’s degree.

Location
The Simulation Center at Fairbanks Hall
340 West 10th Street, Ste. 4100
Indianapolis, IN 46202

Tuition
$399. Class limited to first twelve participants. Refunds less a $50 cancellation fee will be issued if cancellation occurs prior to March 9, 2018. No refunds thereafter.

To Register
http://go.iu.edu/1GFT (Case sensitive. Number “1” followed by capital GFT)

Presented by Alan Jeroff, DMD
November 10, 2017
8:00 AM - 4:00 PM
6 CEUs

This course will focus primarily on the principles of oral surgery and on the most up-to-date techniques of exodontia to improve clinical success. With implant dentistry quickly becoming the standard of care, knowing how to extract a tooth leaving as much boney architecture as possible is essential.

Objectives
• Learn the minimally invasive tooth removal techniques and remove broken and difficult teeth with minimal flap.
• Perform pre-operative patient evaluation and assess difficult extractions.
• Prescribe medications most commonly used for oral surgery.
• Apply effective local anesthesia techniques.
• Use instrumentation for atraumatic extraction and dento-alveolar surgery.
• Apply tissue management and flap designs for various surgical procedures for optimal end result.
• Effectively retrieve broken root tips utilizing principles of exodontia.
• Understand the advantages and disadvantages of socket grafting and the relevance of choosing a graft material.
• Manage complications more efficiently.
• Learn different suturing techniques.

Faculty
Alan Jeroff, DMD, graduated from the University of Manitoba Dental School and practices in Vancouver, British Columbia. He completed a mini-residency in Oral Surgery at the University of the Pacific Arthur A. Dugoni School of Dentistry in San Francisco and was a clinical tutor at the University of Otago School of Dentistry in Dunedin, New Zealand. He is presently an assistant clinical professor at the University of British Columbia Faculty of Dentistry.

Location
Willows on Westfield
6729 Westfield Blvd.
Indianapolis, IN 46220

Tuition
$250. Please go to http://go.iu.edu/1GFd to register.

ACCREDITATION STATEMENT
Indiana University School of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

DISCLOSURE STATEMENT
In accordance with the ADA CERP Standards for Commercial Support, educational programs sponsored by Indiana University School of Dentistry (IUSD) must demonstrate balance, independence, objectivity, and scientific rigor. All faculty, authors, editors, and planning committee members participating in an IUSD-sponsored activity are required to disclose any relevant financial interest or other relationship with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services that are discussed in an educational activity. Note: While it offers CEU credits, these activities are not intended to provide extensive training or advanced certification unless otherwise stated.
