Dear Dental Professional,

The backbone of any successful dental practice lies in its Hygiene Department. We are committed to bringing you the latest ideas and concepts to energize you and your practice. The IUSD Hygiene Series is one of our longest ongoing CE programs.

Part I will be at the Renaissance North in Carmel, IN - 11925 N. Meridian Street, Carmel, IN, 46032, (314) 816-0777 We will be returning to The Willows on Westfield, 6729 Westfield Blvd. Indianapolis, IN 46220 for Part II and III. (317) 251-2628 Visit their website at: <http://www.willowsonwestfield.com/>

Don't forget! Licensing is due on March 1, 2018. New rules include 19 hours of CEUs since March 2, 2016, half of which must be completed ON SITE (as opposed to online). You must also complete the two hours of ethics and jurisprudence, which are included in Part II of our series. Hygienists must also complete a CPR course, of which only two can be counted toward the CE requirement.

This year's programs are offered on an individual basis of \$170 per day, per hygienist. Special savings: if enrollment is received in the CE office before September 20, 2017, the cost for the series will be \$340 for the first hygienist and \$310 for each additional hygienist from the same office.

Beyond 32 Teeth: The Mouth Is The Health Indicator AND How To Put On An Amazing Daily Dental Show!

PRESENTED BY DR. LISA KNOWLES

Friday, September 29, 2017
8:30 a.m. - 2:30 p.m. 5 CEU's

In dentistry, we recognize an unhealthy mouth can indicate an unhealthy body, but we are unsure of next step initiatives to get our patients onto the road to good health. During the morning session, Dr. Knowles will review the clinical oral manifestations of stress, disease, and behavior types and will review current studies associating the oral and systemic connections. For the afternoon session, Dr. Knowles will take a deep look into interpersonal communication and will use her background in communication and small business to help you see patient care through a different lens. Patients want a communicator, and they want someone who cares. This course examines what it takes to fulfill exceedingly high patient expectations in our over-stimulated world.

Learning Objectives:

- Learn how to collaborate with professionals to address comprehensive patient needs through the Five Friends Approach.
- Learn and evaluate your communication style.
- Learn how to decipher what a patient wants so you can give them the show they anticipate.
- Learn how to use the A.W.E. technique to improve communication with each other and with patients.

About the Speakers:

Lisa Knowles, DDS owns a practice in Michigan, and is an adjunct professor at the University of Michigan School of Dentistry. She is a Board of Trustees member for the Michigan Dental Association and is the editor for the Central District Dental Society. Dr. Knowles is a visionary thinker and an energy analyzer who looks at the whole picture as well as the whole patient. She speaks and writes broadly about dentistry—beyond the teeth—and works to help others understand the oral and systemic connections between dentistry and medicine.

Location:

11925 N Meridian Street
Carmel, IN 46032
(317) 816-0777

Update on Oral Cancer and Its Common Imitators AND To Refer or Nor To Refer.....That is the Question!

PRESENTED BY DR. PAUL EDWARDS & DR. HARVEY WEINGARTEN

Friday, February 9, 2018
8:30 a.m. - 2:30 p.m. 5 CEU's

We begin this course with a review of the different clinical presentations of oral cancer, placing an emphasis on early recognition. More common conditions that may look similar to early oral squamous cell carcinoma, such as traumatic ulcers, lichen planus, idiopathic leukoplakia, candidiasis and vesicubullous conditions, will also be reviewed. Clinical features that can be used to differentiate between these conditions will be stressed.

The afternoon session will satisfy your CE requirements for Ethics, Indiana Law and Jurisprudence. Come and join in the discussion as to why we refer or why we don't refer. After reviewing the Principles of Ethics and the Hierarchy of Treatment, we will consider the ethics as well as the practical issues of referral. You might be surprised as to the basis of why we refer. In addition, we will talk about the changes in the Indiana Law satisfying the the requirment for Indiana State Licensing.

About the Speakers:

Paul Edwards, DDS, MSc, is Professor in the Dept. of Oral Pathology, Medicine and Radiology at Indiana University School of Dentistry. Dr. Edwards received his MSc in Biochemistry and DDS from the University of Toronto and his specialty in Oral and Maxillofacial Pathology from Long Island Jewish Medical Center in New York. He is a Diplomate of the American Board of Oral and Maxillofacial Pathology.

Harvey Weingarten DDS received his DDS degree from Indiana University School of Dentistry. Dr Weingarten has been in private practice in South Bend Indiana for 37 years. Dr. Weingarten is Associate Clinical Professor with IU School of Dentistry and Director of Continuing Education. He currently serves as a NERB/CDCA examiner, also in the capacity of Vice-Chairman.

Location:

6729 Westfield Blvd.
Indianapolis, IN 46220

Pharmacology: What's New and What to Review

PRESENTED BY DR. ANN ESHENAU SPOLARICH

Friday, April 6, 2018
8:30 a.m. - 2:30 p.m. 5 CEU's

Treating medicated patients and administering, dispensing and applying medications are critical components of a dental hygiene practice. They purpose of this course is to discuss how to safely treat medicated patients throughout the dental hygiene process of care. An update about hot topics in pharmacology will be provided, including antibiotics, anesthetics and chemotherapeutic agents. Strategies to reduce risks and improve medication safety in your practice will be discussed.

Learning Objectives:

- Discuss the benefits of drug information systems that should be used to obtain information regarding drug indications, contraindications and adverse events.
- Discuss simple strategies to reduce risks associated with medication use in the dental office.
- Discuss the relationship of antibiotic stewardship, the use of antibiotic premedication for patients receiving dental hygiene care.
- Discuss considerations for use of topical and local anesthetic agents.
- Review common misconceptions about the safety of chemotherapeutic agents used to reduce plaque and gingivitis.

About the Speakers:

Ann Eshenaur Spolarich, PhD is an internationally recognized author and speaker on pharmacology and the care of medically complex patients, presented over 900 lectures and has more than 100 professional publications. She is Professor, Course Director of Clinical Medicine and Pharmacology, and Director of Research at the Arizona School of Dentistry and Oral Health, where she also teaches part-time in the Special Care Clinic as well as Associate Director of the National Center for Dental Hygiene Research & Practice.

Location:

6729 Westfield Blvd.
